PREFACE

Marine Geological Institute of Indonesia (MGI's) responsibilities are to provide marine geoscientific map, research and information to support sustainable development of Indonesian's mineral and petroleum industries, mapping of Indonesian Coastal and Ocean Territory, identification of marine and coastal geological hazards, and to provide marine and coastal geological and geophysical data base for marine and coastal landscape.

In this second edition of year 2017, the number of important information are highlighted involving: Estimation of Sea Current Energy Potential by Using Calculation Models of Horizontal Axis Current Turbine in Toyapakeh Strait, Nusa Penida, Bali; Concentrations of PAHS (Polycyclicaromatic Hydrocarbons) Pollutant in Sediment of The Banten Bay; Sediment Characteristics of Mergui Basin, Andaman Sea based on Multi-proxy Analyses; Coastal Protection of Southern Part of The Bintuni Bay From Oil Spill: An Environmental Sensitivity Index Approach; Elemental Analysis on Marine Sediments Related to Depositional Environment of Bangka Strait.

Editors

BULLETIN OF THE MARINE GEOLOGY

Vol. 32, No. 2, December 2017

CONTENTS

<i>Estimation of Sea Current Energy Potential by Using Calculation Models of Horizontal Axis Current Turbine in Toyapakeh Strait, Nusa Penida, Bali</i> Beben Rachmat and Delyuzar Ilahude	51-59
<i>Concentrations of PAHS (Polycyclicaromatic Hydrocarbons) Pollutant in Sediment of The Banten Bay</i> Khozanah and Deny Yogaswara	61-66
<i>Sediment Characteristics of Mergui Basin, Andaman Sea based on Multi-proxy Analyses</i> Rina Zuraida, Rainer A. Troa, Marfasran Hendrizen, Luli Gustiantini, and Eko Triarso	67-75
<i>Coastal Protection of Southern Part of The Bintuni Bay From Oil Spill: An Environmental Sensitivity Index Approach</i> Undang Hernawan and Rahayu Kusumah Risdianto	77-88
<i>Elemental Analysis on Marine Sediments Related to Depositional Environment of Bangka Strait</i> Pungky Sampurno, Rina Zuraida, Nazar Nurdin, Luli Gustiantini and Noor Cahyo Dwi Aryanto	89-96
